PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of experience building and maintaining scalable web applications across fintech, banking, healthcare, logistics, and enterprise environments. Experienced in developing both frontend and backend solutions using C#/.NET, React, [Next.js](#), TypeScript, JavaScript, and RESTful APIs. Strong background in designing responsive user interfaces, integrating backend services, implementing business requirements, troubleshooting production issues, and collaborating with cross-functional engineering teams. Comfortable working across the full software development lifecycle, from requirements analysis, testing, deployment, and production support. Experience with CI/CD, Azure DevOps, Docker, and monitoring tools.

TECHNICAL SKILLS

Backend: C#, .NET, RESTful APIs, Node.js, Express.js, API Integration

Frontend: React.js, Next.js, Angular, Aurelia, TypeScript, JavaScript (ES2020+), Redux

UI & Styling: Tailwind CSS, SCSS, Material UI, Styled Components, Storybook

Design Collaboration: Figma, Adobe XD - pixel-perfect implementation from wireframes

Databases & Data: MongoDB, PostgreSQL, REST APIs, JSON Testing: Jest, React Testing Library, Cypress (E2E)

DevOps & Tools: Azure DevOps, Docker, Git, GitHub, CI/CD Pipelines, New Relic, Sentry, Postman Engineering

Practices: Agile/Scrum, TDD, Code Reviews, Pair Programming, SDLC

EXPERIENCE

FULL-STACK DEVELOPER — CAVISTA TECHNOLOGIES

2023 - Present

- ▶ Develop and maintain full-stack enterprise applications in C#/.NET, implementing business logic and supporting API-driven application workflows.
- ▶ Troubleshoot and resolve issues across the application stack, working closely with backend engineers, QA, product, and other engineering teams to identify root causes and deliver reliable fixes.
- ▶ Led bug resolution and performance optimisation initiatives, reducing critical UI defects by 40% through systematic code review and testing processes.
- ▶ Integrate and consume RESTful APIs, handling asynchronous data flows, validation, error states, and application-level business requirements. Participate in code reviews, technical discussions, sprint planning, and continuous improvement of development practices.

Technologies: C#, .NET, Aurelia, TypeScript, JavaScript, RESTful APIs, SCSS, Azure DevOps, Git, CI/CD

Front End Developer - Sterling Bank (via Uridium Technologies)

2022 - 2023

- ▶ Built and maintained web applications for Sterling Bank's payment and digital lending automation unit, serving hundreds of thousands of Nigerian banking customers.
- ▶ Delivered new features across the digital lending pipeline, reducing loan processing UI latency by 30% through React performance optimisations (memoization, lazy loading, code splitting).
- ▶ Collaborated with product and QA teams in a fast-paced Agile environment, consistently shipping features on schedule.

Technologies: Angular, React, Redux, SCSS, TypeScript, Tailwind CSS, RESTful APIs

Front End Developer - Polaris Bank (via Calif Technical Solutions)

2021 – 2022

- ▶ Contributed to the design and implementation of payment web applications, gaining hands-on experience with production-grade banking software.
- ▶ Delivered responsive UI components integrated with backend payment APIs, supporting the bank's digital transformation roadmap.

Technologies: Next.js, SCSS, TypeScript, RESTful APIs.

Front End Developer - Decagon

Dec 2021 – Dec 2022

- ▶ Designed and shipped 10+ web applications with a 98% project completion rate across a rigorous fellowship program modelled on top-tier engineering standards.
- ▶ Developed the Decagon Fellowship Programme Portal used by 500+ engineers across Nigeria for tracking assessments and learning milestones.
- ▶ Built production-ready applications with React, Redux, and Next.js following industry-standard practices, including code review, CI/CD, and documentation.

Technologies: *JavaScript, TypeScript, React, Redux, REST API, Tailwind CSS, Next.js*

Software Developer / Head of ICT - TMB Express Ltd,

Nov 2020 - Dec 2021

- ▶ Built and launched a full-stack online portal for digital logistics services from the ground up, sole developer - increasing product sales by 60% within 6 months.
- ▶ Integrated USSD functionality enabling feature-phone users in rural Northern Nigeria to access logistics services, expanding the company's addressable market.
- ▶ Managed all IT infrastructure, networks, and systems while simultaneously leading software development.

Technologies: *JavaScript, React, Bootstrap, Node.js, Express, MongoDB, USSD, CSS*

Network Administrator / Asst. Manager - Akbar Reliance Enterprises,

Jul 2019 - Nov 2020

- ▶ Managed computer networks and daily business operations; developed and executed growth strategies that contributed to consistent quarterly revenue improvement.
- ▶ Administered IT systems, ensuring 99%+ uptime on business-critical infrastructure.

EDUCATION

B.Sc. Computer Science - Federal University Birnin Kebbi, Nigeria / CGPA: 4.23 / 5.00 / Oct 2014 - Nov 2018

SELECTED PROJECTS

PayClick - Fintech Mobile App <https://pay-click-ruby.vercel.app/>

- ▶ A modern Nigerian fintech app built with Expo/React Native featuring a unique Northern Nigerian (Hausa) architectural design language. Supports P2P transfers, bill payments, airtime top-up, and transaction history with mock data reflecting Northern Nigerian demographics.
- ▶ Technologies: React Native (Expo), TypeScript, React Navigation, NativeWind (Tailwind).

Decagon Fellowship Portal: fellowship.decagonhq.dev/engineer/login

- ▶ Engineering assessment and learning portal serving 500+ Decagon fellows. Built and maintained the frontend with React and REST API integrations.

Device Intel: <https://device-intel-two.vercel.app/login>

- ▶ Intelligent laptop lifecycle and refresh automation platform. Centralizes asset intelligence, employee-reported device health, repair history, and replacement recommendations.

TMB Logistics Catalog tmb-frontend-two.vercel.app

- ▶ Full-stack logistics portal with USSD integration, built solo and increased company sales by 60%.

CERTIFICATIONS & AWARDS

- | | | |
|---|---|------------------------------|
| ▶ Scrum Fundamentals Certified | - | SCRUMstudy (April 2022) |
| ▶ CCNA, IT Essentials & Cisco Introduction to Cybersecurity | - | (September 2019) |
| ▶ EF Standard English Test (EF SET) | - | April 2022 |
| ▶ Accelerated Jobberman Soft Skills Training | - | June 2022 |
| ▶ Nigerian Association of Computer Science Students | - | Service Award (FUBK Chapter) |

RESEARCH

Proposed Students Service Providers' Directory Using USSD - Undergraduate Final-Year Project

Designed and implemented "S-Service", an innovative student services directory accessible via USSD on feature phones - addressing real-world access challenges in underserved Nigerian communities.
